

## Thermocouples

### Ensures High-precision Measurements

Toshiba Materials offers thermocouples, which excel in insulation, heavy duty and mechanical properties, for various fields of industrial-temperature measurement from ordinary apparatus to the exhaust gas of aircraft engines.

### [Advantages]

- Long serviceable life and high reliability
- Higher mechanical strength
- Excellent responsibility (High sensitivity)
- A variety of shapes and materials enables the best selection for individual cases.

### [Applications]

- Temperature measurement of industrial furnaces
- Temperature measurement of engine rooms of aircrafts
- Various precision temperature measurements
